

BIPRAJEET SEN

Computer Science Graduate | Data Analytics, BI & Cybersecurity

Guwahati, Assam | +91-9707075319 | 09biprajeetsen@gmail.com | [linkedin.com/in/biprajeetsen](https://www.linkedin.com/in/biprajeetsen) | github.com/biprajeetsen

SUMMARY

Computer Science graduate (B.Tech, Vellore Institute of Technology) with a versatile foundation spanning data analytics, business intelligence, database engineering, and cybersecurity. Skilled in **Python, SQL, Power BI, ETL pipeline development, and security risk assessment** — delivering data-driven dashboards, structured technical documentation, and clear stakeholder reporting. Proven ability to lead teams, solve problems methodically, and translate complex requirements into working solutions. Open to full-time and internship roles.

SKILLS & TOOLS

Data Analysis: Python (Pandas), SQL, Microsoft Excel (MS Excel — PivotTables, VLOOKUP, conditional formatting), EDA, Statistical Analysis, Data Cleaning & Transformation

Visualisation & BI: Power BI (DAX, data modelling, interactive dashboards), Tableau, KPI Reporting, Cohort Analysis, Trend Analysis, Data Visualisation, Data Governance

Databases: MySQL, MongoDB, Query Optimisation, ETL Pipelines, Jupyter Notebooks

Security & Compliance: Data Privacy & Compliance (GDPR, CCPA), Role-Based Access Control (RBAC), Data Masking & Anonymisation, Secure Data Handling, Cybersecurity Awareness, Vulnerability Basics

Business Skills: Requirements Analysis, Business Requirements Documentation (BRD), Process Documentation, Business Process Improvement, Stakeholder Reporting, Risk Register Preparation

Project & Ops: Project Coordination, Workflow Planning, Cross-functional Collaboration, Budgeting Basics, MS PowerPoint, Presentation & Communication

Soft Skills: Analytical thinking, structured problem-solving, verbal & written communication, leadership, time management, adaptability

PROJECTS & PRACTICAL EXPERIENCE

Customer Behaviour Analysis & Power BI Business Intelligence Dashboard

Feb 2026 – May 2026

Tools: Python, SQL (MySQL), Pandas, Power BI | Individual Academic Project | [GitHub](#)

- Engineered a clean, analytics-ready **10,000-record customer shopping dataset** using Python (Pandas) and SQL — applied validation, deduplication, and standardisation across 8+ fields to ensure data integrity and accuracy.
- Analysed retail shopping trends via EDA to identify behaviour patterns, build segment profiles by purchase frequency and product preference, and surface **churn risk indicators** — translated findings into actionable recommendations.
- Delivered an interactive Power BI dashboard covering KPIs including **CLV, churn rate, and cohort retention** across customer segments and product performance — enabling self-serve, data-driven decisions for stakeholders.

Business Risk Assessment & Process Documentation Study

Apr 2026 – Present

Tools: MS Excel, CSV, PDF Report | Frameworks: ISO 27001 (reference) | Individual Academic Project | [GitHub](#)

- Modelled an asset inventory and criticality assessment for a fictional organisation — catalogued **25+ information assets** across 4 risk categories, scored by likelihood and impact, and prioritised remediation using a qualitative risk matrix in Excel.
- Developed a structured **risk register (Excel + PDF report)** documenting threats, vulnerabilities, control rationale, and residual risk ratings — mapped controls to ISO 27001 Annex A and produced a stakeholder-ready report with a phased remediation roadmap.

Database Design & SQL-Based Reporting System

Nov 2025 – Mar 2026

Tools: MySQL, SQL, Query Optimisation, ETL Pipelines | Group Project | [GitHub](#)

- Architected a normalised MySQL database schema structuring **6+ relational tables** (Orders, OrderDetails, Products, Customers, Inventory, Transactions) — enforced referential integrity and reduced redundancy through 2NF/3NF normalisation.
- Automated data consolidation by writing optimised SQL queries and building an ETL pipeline (joins, subqueries, indexing, RFM scoring) using SQLAlchemy and Pandas to process **10,000+ raw records** into clean, analytics-ready tables — powering reports on inventory turnover, sales performance, and customer segmentation.

EDUCATION

B.Tech — Computer Science & Engineering (Cybersecurity & Digital Forensics)

2022 – 2026

Vellore Institute of Technology (VIT) | GPA: 8.44 / 10.00

Higher Secondary Certificate — Science (PCM)

2022

SSA, Dispur, Guwahati | 80.0%

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Data Visualisation: Empowering Business with Effective Insights** — Tata Group / Forage Virtual Experience (2026)
- Google Cybersecurity Professional Certificate** — Google / Coursera (2025)
- Microsoft Power BI Data Analyst (PL-300)** — Microsoft (In Progress — Expected Oct 2026)

ACHIEVEMENTS & LEADERSHIP

- President — IEEE Student Branch, VIT (2024–2025):** Led a 50+ member technical organisation; coordinated cross-functional teams across budgeting, sponsor outreach, and logistics; planned and executed a 200+ participant hackathon end-to-end; grew branch membership by ~40%.
- Winner — Developer Week Hackathon (2025):** Selected as winner from 30+ teams in a 24-hour event for structured problem-solving and creative design.

ADDITIONAL INFORMATION

Languages: English (Professional), Bengali (Native), Hindi (Conversational), Assamese (Conversational)

Availability: Immediate — open to full-time and internship roles across data analytics, cybersecurity, software/IT, and business analysis
